Atalaia is part of the Pego Hybrid Cluster awarded to Endesa in 2022, which will feature solar, wind, and storage facilities as well as social and economic development initiatives.

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

The Tâmega Gigabattery Project - Europe's largest hydro-pumped storage system - combines water reservoirs with battery parks. Think of it as a giant ecological Duracell bunny, storing enough energy ...

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage Systems (BESS) to support its rapidly ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Biogas microplants, batteries, pumped hydro, and emerging technologies like green hydrogen form a stability ecosystem that will allow Portugal not only to maintain its leadership in ...

Storage provides real-time flexibility, enabling participation in balancing markets and maintaining grid stability and inertia, especially in Portugal where these markets are growing.

1 375mw energy storage system in Portugal

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the ...
