Its design allows for increased loading space on mainline and feeder ships, thereby reducing the length of time ships spend in port. Our containers help improve operational efficiency by ...

With more than 20% of returning containers brought back to their port of origin empty, the SeaFold HC 40" aims to combat this. It has the potential to reduce the cost of repositioning boxes by ...

Currently, the most commonly used container sizes are the TEU and the FEU (Forty-foot Equivalent Units). These containers are available as general or temperature-controlled containers, ...

The SeaFold 40" is manufactured using the highest quality industry standard materials. The box has passed all ISO and water ingress testing and is compatible with all standard lift ...

Furthermore, the container is compatible with all standard lift equipment used in most ports, terminals and depots, and no special equipment is needed to operate it.

Quickly and safely folded or erected in minutes with limited labor and mechanical resources. Compatible with all standard equipment that exist at most major ports, terminals and depots around the world. ...

COLLAPSECON containers are collapsed at speed by the COLLAPSECON Operating Station, the only automated solution on the market. It is designed to seamlessly integrate into operations at scale, ...

A collapsed bundle of five SEAFOLD containers accommodates the same slot as one conventional 40" High Cube container, creating 80% more storage and operating efficiencies at terminals, railheads, ...

In 2013, HCI's 40-foot collapsible container, called 4FOLD, was approved by ISO (International Organization for Standardization) and CSC (Container Safety Convention 1972). It is, therefore, ...

40-foot Apia folding containers used at port terminals

Focusing on the most popular container in the market today (40-foot), HCI has continually evolved the main structure and design to create greater and greater efficiencies -- the container can ...
