What is a battery line Safety Cabinet?

The BATTERY line safety cabinets are specially constructed to meet the high requirements for the safe storage and charging of lithium-ion batteries, which can self-ignite in the event of malfunction.

Should batteries be stored in a battery safety cabinet?

If comprehensive fire protection is required for battery storage, battery safety cabinets are the right choice. On the other hand, if the focus is purely on storage and orderly charging, normal charging cabinets are sufficient.

Should defective batteries be stored?

Where should lithium-ion batteries be stored?

Safety cabinets for lithium-ion batteries are used in many areas. Large quantities of small and medium-sized batteries are often used in commercial environments in particular, and these should normally also be stored and charged in fireproof safety storage cabinets.

Are battery cabinets fireproof?

Battery cabinets comprise two product classes - on the one hand rather simple battery charging cabinets, which have a charging option or a power connection, and on the other hand fireproof safety cabinets, which have a particularly high safety level for the storage of lithium-ion batteries and are usually also fire protection-certified.

Your battery deserves a home that protects and thinks: T&#220;V-certified battery cabinets from AIB Kunstmann - strong, smart, and secure. Tradition meets innovation since 1982. Secure the ...
