How much solar power does Armenia have?

Newly tendered solar deals comprise 210 MW of capacity. The government expects solar PV capacity to reach 100 MW by 2024 and 1,000 MW by 2030. According to the MTAI, which oversees the energy sector, wind energy potential in Armenia is approximately 450 MW.

Who provides electricity in Armenia?

From 2006 to 2022, Electric Networks of Armenia (ENA) was the sole electric power distributor in the country, and still provides electricity to most users. It is Armenia's largest employer and serves approximately 985,000 electric utility customers.

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.

How has the energy sector changed in Armenia?

Armenia's energy sector has moved from a state of severe crisis in the early 1990s to relative stability today. A combination of policy, legal, regulatory, and institutional reforms have had good results.
