Why are Chinese solar companies moving to Southeast Asia?

Ever since finding themselves in the crosshairs of US import tariffs in 2012, Chinese solar manufacturers began shifting their production to Southeast Asia to circumvent trade barriers. More recently, overcapacity and brutal price wars in China's domestic market have accelerated these international relocations.

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment - a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Where do Southeast Asia's Solar Exports come from?

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand and Cambodia, according to BloombergNEF. But this successful run is now under threat.

Which Chinese companies are investing in solar energy?

Notable Chinese solar investments include Trina Solar's two factories in Vietnam, producing silicon wafers and solar cells, with a third, USD 454 million, 25-hectare facility announced.

In its report Q2 Southeast Asia Solar Supply Chain Map (SSCM), the analysts count the region's combined production capacity for solar cells to grow from 50 GW now to 68 GW by ...

2025's top solar companies in Asia compared: Performance, market share & technological leadership. Includes JinkoSolar, LONGi, and Grace Solar mounting solutions.

Hong Kong-based Sinovoltaics has recently released the inaugural edition of its Southeast Asia Solar Supply Chain Map 2025, offering valuable insights into the rapidly changing solar ...

According to the Asia Society, this investment surge has been driven by Chinese companies" aiming to avoid trade barriers in advanced economies, to seek lower production costs, ...

Asian Solar Cells

Regions beyond the four Southeast Asian countries ... are poised to emerge as attractive new hubs for Chinese solar firms in the near term." BloombergNEF said Chinese solar product ...

Hong Kong-headquartered Sinovoltaics has released its first edition of the Southeast Asia Solar Supply Chain Map 2025 report. The market insights series features maps for the region - ...

Renewable energy in Japan will receive a seismic shift via perovskite solar cells, the latest development that would change the way solar energy is viewed. Lightweight, flexible, and adaptable, these solar ...

The Asia Pacific Perovskite Solar Cell Market size is valued at USD 115 million in 2023, driven by market opportunities, sector analysis, and strategic forecast. Gain insights on market share and revenue.

The Asia-Pacific perovskite solar cell market size is expected to hit around USD 4,728.55 million by 2034 and is growing at a CAGR of 10.84% from 2025 to 2034.

The Asia Pacific Perovskite Solar Cell Market, valued at USD 261.39 million in 2024, is rapidly expanding due to the technology's potential to produce cost-effective and highly efficient solar ...
