Engineers have developed a water-based battery that could help Australian households store rooftop solar energy more safely, cheaply, and efficiently than ever before.

As more renewable energy generation enters the grid, the need for energy storage is increasing. This funding reflects ARENA's strategic priority to reduce the cost and increase the ...

This guidance report has been commissioned by the Australian Energy Council to initiate and facilitate collaboration amongst its member organisations towards a harmonised leading practice approach for ...

There are limited commercially mature (bankable) energy storage options in Australia that are deployable in the near term, and the most widely deployed systems in Australia, lithium-ion batteries ...

Diversify global battery supply chains and strengthen Australia's economic resilience, ensuring reliable energy storage that will support greater use of renewables in Australia's energy systems.

Building and Energy has prepared the following guidance on lithium-ion batteries used in battery energy storage systems (BESS).

In 2025, Australia is experiencing explosive growth in solar and energy storage. This guide comprehensively analyzes off-grid battery systems in Australia, the best solar batteries in Australia, ...

We reviewed the progress of low-temperature Li-S battery. Summarized the development of lithium sulfur batteries, collected the relevant data, and conducted a detailed analysis. Finally, we ...

The objective of this document is to provide guidance to the industry on the relevant electrical safety requirements for electrical energy storage (EES) equipment.
