This is very tricky. 3 panels is not really going to work very well for you, maybe OK in good sun, but it's likely that the MPP Voltage of the array will be lower than $V_{bat}+1$ and then you would not be getting ...

Can an odd number of photovoltaic panels be used

Nearly seven in 10 solar panel owners we surveyed have had no technical problems with their solar panel system since it was installed. Among those who did report a technical fault, inverter ...

I have a situation where I have an uneven number of pv modules that I wish to connect to a single MPPT charge controller. In a single series they exceed the rated power of a given MPPT ...

This also demonstrates how a "weak" panel could drag-down an entire array. Although disparity between panels of the same age/type is rare, I have found some that tested a fair bit lower ...
