How to store flowers to keep them fresh?

Here are some expert tips on how to store flowers to keep them fresh, ensuring that they stay as beautiful as the day you bought them. Hydration is essential for keeping flowers fresh. Upon receiving your flowers, trim the stems at a 45-degree angle to allow for better water absorption.

How do you store flowers in the fridge?

Store the flowers in a refrigerator set to around 40°F (4°C). Ensure there is no food in the fridge that could produce ethylene gas, and keep the flowers away from the refrigerator fan to prevent direct cold air from damaging them. Regularly inspect your floral arrangement and remove any wilting or dead flowers.

Where should flowers be stored?

Store your flowers in a cool, draft-free environment, ideally between 34-36°F (1-2°C). Avoid placing them near heat sources such as direct sunlight, radiators, or kitchen appliances. For home storage, a cool basement or an air-conditioned room can be an ideal spot. Cleanliness is vital to prolonging the life of your flowers.

How long can you keep flowers fresh?

In general, you should avoid picking flowers that are too open or already have dry or brown petals. Once you have the right flowers, it's up to you to keep them fresh for as long as you can. How Can You Prolong the Life of Your Flowers? Cut flowers will eventually wilt, but you can give your lovely arrangements a longer life with special care.
