Faced with China's dominance of the lithium supply chain, western officials are pitching their investment offer to African countries as a more socially responsible alternative.

China's swift action to tap into new lithium supply hubs from Africa is paying off, helping the world's top maker of electric vehicle batteries overcome market shortages of this key metal.

Africa is at a critical crossroads in developing its lithium industry, which could significantly boost its prosperity. China has worked for years to secure a reliable supply chain for essential ...

Chinese miners and refiners are driving a surge in African lithium output, shrugging off concerns over a glut to lock in future supplies of the critical battery metal.

With the global shift to electric vehicles (EVs) accelerating, China is cementing its dominance over the lithium supply chain by pouring investment into African mines, creating a new center...

South Africa, Gabon and Ghana collectively account for more than 60% of global manganese production, while Zimbabwe, the DRC and Mali hold globally significant lithium reserves ...

Chinese miners and refiners are driving a significant increase in African lithium production, pushing forward despite concerns of an oversupply to secure future resources of this essential battery metal.

CHINA'S early move to tap into new sources of lithium supply across Africa is proving to be a fruitful endeavour, helping the world's top electric-vehicle battery producer navigate the tight market ...

China's early move to tap new centers of lithium supply across Africa is reaping rewards, helping the top electric-vehicle battery producer navigate a tight market for the key metal.

China-Africa high-rate lithium battery pack

China has established itself as a dominant force in Africa's mining sector, with a strategic focus on securing essential resources for its manufacturing and energy transition goals.
