What are mobile solar containers?

Mobile Solar Containers revolutionize energy access. Compact & portable, they integrate foldable photovoltaic panels for swift deployment. Overcoming bulkiness of traditional mobile stations, these containers offer efficient power supply, enhancing convenience & environmental sustainability. Product Introduction

What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Solar Container Photovoltaic container is a mobile device that integrates a solar photovoltaic power generation system, with a container structure that is easy to transport and deploy. ...
