-----

There should be individual cabinet protection utilizing fuses, DC disconnect switches, or individual DC circuit breakers per cabinet when multiple cabinets are connected in parallel.

Refer to "Securing the Batteries Using the Battery Retention Strap" on page 21 for instructions on securing the batteries using the buckle strap provided with the battery cabinet.

Battery cabinets that are not supplied with an incorporated DC output disconnect device must have an appropriate disconnect device provided external to the cabinet.

The instructions in this manual are intended for a **SKILLED TECHNICIAN** (paragraph 2.2.1) to provide information on how to install and maintain the battery cabinet of the Keor DK R/T series.

Use a multimeter to measure the voltage of the battery group, which should be at least 36Vdc for the SolaHD S4K2U36BATD, 48Vdc for the SolaHD S4K2U48BATD, and 72Vdc for the SolaHD ...

Installation or replacement of batteries must be located in a **SERVICE ACCESS AREA**: The service manual shall include the following instructions for battery replacement and disposal:

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery.

Install a miniature DC power supply (HMP400 or UP5) in the instrument room of the high voltage cabinet, and allocate a miniature DC power supply to each high voltage cabinet equipped with a ...

Only trained and qualified electricians should install or maintain the DC cabinet. The DC cabinet is heavy and will require lifting equipment in all circumstances. Before removing any covers or batteries the ...
