The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system.

Project brief: PREDP piloted three types of renewable energy devices in rural areas of Timor-Leste, focusing on isolated villages. It aimed to understand the constraints and challenges in disseminating such technologies, ...

The power plants are under an operation and maintenance (O& M) contract with Wartsila, which ends in 2022. This O& M contract is likely to be extended until EdTL gains sufficient experience in operating the power plants.

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies.

Now, the system is live. It's a robust hybrid setup that intelligently uses solar power, stores excess energy in batteries, and only calls on the diesel generator as a last resort. It's expected to cut fuel ...

EDTL has invited, through an international public tender, proposals for the development of the Project by independent power producer ("IPP"). Once selected, the IPP is expected to establish a special purpose ...

What is the Timor-Leste solar power project?The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 ...

In a landmark moment for Timor-Leste's energy future, a Power Purchase Agreement (PPA) has been officially signed for the country's first-ever solar power project integrated with a Battery...

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will

increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030. Under the current policies, GHG ...
