What is the Enphase ensemble?

The Enphase Ensemble is a family of technology that is designed for either whole-home or partial-home solar energy storage and backup in the case of a grid failure. The system includes the Encharge 10 or Encharge 3 storage systems (or a combination of both), the Empower smart switch, the Enlighten cloud monitoring platform, and the Envoy combiner.

What is Enphase ensemble home battery backup system?

The Enphase Ensemble Home Battery Backup System is a solar, battery backup storage and monitoring all in one solar energy system. With Ensemble(TM) technology, homeowners have power when the grid goes down and can save money when the grid is up.

What is the Enphase Ensemble home energy solution?

The Enphase Ensemble home energy solution is a system powered by Enphase microinverters, which operate independently to generate the most energy possible without a single point of failure. The Enphase Ensemble system takes full advantage of your power and prevents energy waste when nobody's home.

How does Enphase work?

When an Enphase storage system is connected to the grid, the system works as a traditional grid-tied system. During a grid failure or an outage, the Enphase System Controller detects the outage. It then seamlessly transitions the home energy system from the grid to a backup operation mode with the help of the IQ Batteries.
