We design a solar container that fits your needs and send you a personalized quote.

Off-grid industrial projects & outdoor event/field operation support. A reliable clean energy solution designed for mobility, efficiency, and adaptability in challenging environments.

The Mobile Solar PV Container is a portable, containerized solar power system designed for easy transportation and deployment. It integrates advanced photovoltaic modules, inverters, and electrical ...

After predicting extreme weather conditions, such as high wind loads or snow, the entire module area can be folded up, secured on the central container floor and taken out of service within minutes.

Solarcont has developed a portable, containerized PV system featuring 240 solar modules on a folding system for easy removal and storage.

We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

We sell a container including fold-up aluminium solar wings, each made from 8 solar panels, providing 2.4kW power and wired to the pre-fitted technical room inside the container.

Highjoule successfully deploys 1MW off-grid photovoltaic storage system in Guinea using innovative solar folding containers, providing sustainable energy for remote mining operations.

LZY-MS1 Sliding Mobile Solar Container is a portable containerized solar power generation system, including highly efficient folding solar modules, advanced lithium battery storage and intelligent ...
