---

Imagine a remote village nestled in the Himalayas or a mining site in the Andes - places where traditional power grids can't reach. That's where highland energy storage devices shine. These ...

The Highland Council, a local government body in northern Scotland that includes the famous Highlands region, is considering several new large-scale battery energy storage systems ...

Highland Council is exploring the potential of generating and storing its own power. The local authority believes solar and battery storage could bring widespread benefits to communities,...

The proposal, submitted under Section 36 of the Electricity Act 1989, was developed with Aecom and aims to boost renewable energy storage, enhance grid stability and contribute to the ...

The core consists of three parts - photovoltaic power generation, energy storage batteries, and charging piles. These three parts form a microgrid, using photovoltaic power ...

Scotland isn't just about tartan and haggis anymore. With 97% of its wind power storage power generation capacity coming from onshore and offshore turbines, Scotland's become the "Silicon ...

Scotland's energy ambitions just got a major jolt. The government has approved the UK's biggest-ever pumped hydro project--1.8GW strong with 40GWh of energy storage ...

The proposed project is anticipated to produce approximately 150 megawatts per year of alternating current power generation. It would include solar panel arrays, battery storage system, overhead ...

The site's topography and a 500m gross hydraulic head will help exceed all the other Loch Ness projects in power generation and energy storage efficiency. The 2GW capacity of GEE's ...
