Most homeowners need between 15-25 solar panels to power their entire home, but this number varies significantly based on your energy usage, location, and roof characteristics.

Your Home's Electricity Usage
Solar Panel Size
Solar Panel Wattage
Production Ratios
Sunlight and Climate in Your Area
A key factor in deciding the number of solar panels your household will need is to learn your home's energy consumption usage. Electricity usage is measured in kilowatt-hours (kWh) and you can find how much your home currently uses on your utility bill for each billing cycle. For instance, a household using 900 kWh per month with an average of five...
