In September, IKEA U.S. announced two major sustainability initiatives: a set of solar installations at seven different locations and an overhaul of the heating and cooling systems at five other stores.

The future is bright: In Fall 2022, IKEA plans to launch Home Solar with IKEA at select stores in California, by far the leading US state for residential solar.

On closer inspection, the Ikea offers are therefore not worthwhile, even with the discount for Ikea Family or Business Network members. The trend towards balcony power stations continues...

Svea Solar, in collaboration with its partner IKEA Germany, is launching a modular balcony power plant and battery. The solution is designed to make it easier than ever for households ...

In an exciting move for eco-conscious homeowners, T3 reported that IKEA has launched a new solar panel system designed for balconies. It promises an easy, affordable way to harness ...

With a starter package that includes two 450-watt panels and a user-friendly "plug-and-play" installation method, IKEA is poised to make solar power more accessible than ever. Although ...

Common IKEA Solar Generator Issues (And How to Fix Them) Let's break down the top three culprits behind those frustrating IKEA solar generator repair situations:

Through this collaboration, members of the IKEA Family customer loyalty program will be able to purchase home solar solutions, available through SunPower, to generate and store their own ...

If you love IKEA's smart home tech, then you're in for a real treat: the company just launched its lineup of renewable energy solutions in the UK, which includes solar panels, heat pumps,...
