Welcome to Iceland's latest energy storage policy saga - where geothermal steam meets cutting-edge battery tech in a nordic dance of innovation. As of 2025, Iceland's updated strategy is making waves ...

The Icelandic Transmission System Operator (TSO) is Landsnet, a company jointly owned by three state-owned power companies: RARIK, Landsvirkjun and Orkuveita Vestfjarða.

Landsvirkjun is the largest production company, generating around 71% of the country's power, followed by Reykjavik Energy (19%) and a few smaller power companies.

The company owns and operates power plants and power stations to generate electricity, with the necessary infrastructure for electric power transmission and electricity distribution, geothermal works ...

Landsvirkjun is the national power company and is responsible for the majority of Iceland's electricity production. Reykjavik Energy provides electricity, hot water, and geothermal heating to the capital ...

A licence issued by the National Energy Authority is required to construct and operate an electric power plant. The National Energy Authority is responsible for monitoring as well as to regulate the ...

We operate fourteen hydropower stations in four operational areas across Iceland. We operate three geothermal power stations, all located in the Northeast. We operate two wind turbines for research ...

There is a nascent wind energy sector and some interest in developing solar power, especially for off-grid uses. As Landsvirkjun and Reykjavik Energy are publicly owned, tendering is ...

Iceland Geosurvey (GEOGEO) is a public consulting and research institute providing specialist services to the Icelandic power industry, dedicated mainly to geothermal and hydroelectric research.

Can an energy producer lead in innovation? ON Power (Orka nýtt runnar) proves the answer is

Icelandic power storage power company

yes. As a major provider of geothermal electricity and hot water for the Icelandic market, ON Power goes ...
