By integrating solar energy with vertical farming, he has created a model that addresses multiple sustainability goals simultaneously. This research not only contributes to the energy sector ...

Iran's Minister of Energy Abbas Aliabadi announced that 854 solar power plants in varying scales -- from 10 and 20 megawatts up to a massive 2,000 megawatts -- are currently under ...

Iran has set a new record in solar power generation, with output from its solar plants reaching 800 megawatts on August 26, according to the Renewable Energy and Energy Efficiency ...

Iran is preparing for a transformative shift in its energy landscape with a strategy aimed at expanding renewable energy capacity, combining the reliability of hydroelectric power with the...

SATBA pushes forward construction of 1,000 solar power plants in Iran to reduce grid losses, boost stability, and attract private investment.

Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has ...

TEHRAN - Iran is implementing 110 pilot smart irrigation projects covering about 10,000 hectares nationwide as part of a broader push to boost water efficiency and deploy renewable energy ...

The plan aims to generate 500 megawatts of new solar capacity, utilizing the country's abundant sunlight and existing hydroelectric resources. A pilot floating photovoltaic (PV) project, ...

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative, which centers on solar photovoltaic (PV) ...
