-----  
How much does a Level 2 eV charge cost?

Level 2 charging offers the best value proposition for most EV owners - With charging speeds of 12-60 miles per hour and installation costs of \$300-1,500, Level 2 provides the optimal balance of speed, cost, and convenience for daily use, typically paying for itself within 12 months through fuel savings.

What is Level 1 charging?

Level 1 charging operates on standard 120V household outlets with the following specifications: Level 1 charging provides approximately 3-5 miles of range per hour of charging. Here's what this means for popular EV models: Most EVs come with a Level 1 charging cable, also called:

How do I find a charging station?

You have a couple of options if you find all charging stations currently engaged. One is to simply wait until a station becomes free. Alternatively, you can use a mobile app or your electric vehicle's (EV) built-in navigation system to locate another nearby charging station.

What types of EV chargers are compatible with public stations?

While most public stations should be accessible to a wide variety of EVs, specific compatibility can vary. There are three primary categories of EV charging - Level 1, Level 2, and DC fast charging. These categories have different connectors, including but not limited to J1772, CCS, CHAdeMO, and those unique to Tesla.
