Therefore, this chapter presents a systematic literature review of studies on households' intention to install solar PV systems to identify the gaps in the field of study.

A review of applied research conducted on aspects related to the efficiency and versatility of household photovoltaic (PV) power generation systems is presented.

This paper aims to systematically review and analyse the state of solar PV adoption by exploring "What are the key factors influencing the adoption of solar PV at household level?".

This article provides a comprehensive literature review of the current state of solar power generation technologies, their economic viability, and the role of energy storage technologies in ensuring the ...

Based on a review of relevant literature and a multi-phased ...

This systematic literature review aims to bridge this gap by: (a) critically analysing the state of solar PV adoption at the household level and consolidating current research on the topic, ...

Based on a review of relevant literature and a multi-phased statistical analysis of more than 2 million people in southeast Queensland over five years, the paper highlights the complex interplay between ...

The method used in this study is a literature review, data used in the form of articles in electronic databases such as Google Scholar, in the period 2006 to 2023.

To address this question, I have conducted a systematic review to examine which factors support or complicate household solar adoption. I identified 43 studies in 25 countries that describe ...
