This table displays the probabilities of different classes of solar flares occurring today. These probabilities are updated regularly and may differ from other panels.

With SolarAnywhere[®], we have the localized, accurate solar resource data we need to design, transport and build cost-effective Solar Water Farms in remote locations around the world. SolarAnywhere ...

NASA's Solar Viewer allows you to see today's images of the Sun on your desktop. These near realtime images come from NASA/ESA's SOHO mission, NASA TRACE mission, and the Big Bear ...

What is a Coronal Mass Ejection (CME)? How do we know if a CME is Earth directed and when it's going to arrive? The chart has 1 X axis displaying Time. Data ranges from 2026-01-28 11:15:00 to ...

Solcast's live solar data tracks real clouds at a resolution of 1-2km and 5 minutes. Our irradiance data and PV power data is updated every 5 to 15 minutes, downscaled to 90 metre resolution. Aerosol ...

Click on a region to view images and animations for that region. Coverage area depictions are approximate.

Live Power data is available for generation and transmission facilities in CAISO, SPP, ERCOT, MISO, PJM, NYISO, and NEISO. This coverage surpasses anything available on the market and delivers ...

Magn.

The data feeds on this page contain images, videos, graphic visualizations and text-based reports related to the Sun. This includes recent, current and forecast solar conditions.

Live solar irradiance data with real-time updates. Monitor solar assets globally to optimize production and reduce operational risks.
