The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally.

In our paper, we comprehensively review the standards development and current situation of microgrids and DER grid-integration issued by international organizations or individual countries.

NLR provides strategic leadership and technical expertise in the development of standards and codes to improve the integration, interconnection, and interoperability of electric generation and ...

The IEEE 2030 series of standards advances sustainability of the modern power grid through reliable aggregation of diverse energy sources in microgrids and virtual power plants.

This report provides an overview of the microgrid industry in North America, synthesizing information from current literature, available standards, and industry experts.

Microgrids offer a pathway to this future by providing opportunities to reduce costs and emissions while bolstering the resilience of the nation's electricity system.

This paper analyzes a number of cutting-edge innovations in smart grids before offering in-depth analyses of communication standards, technologies, difficulties, and future research ...

SEPA hosted a briefing for Microgrid Controller Standards IEEE 2030.7 and IEEE 2030.8; to provide an overview of the standards and explore the challenges and next steps for microgrid standards.

Welcome to the main page of the Microgrids, a wiki-style deliverable that aims to provide access to existing EPRI available resources, deliverables, and ongoing research on microgrid ...

Microgrid related standards research institute

It covers and compares technology standards from various regions and communities, offering a comprehensive overview of power electronic devices, DC metering standards, grounding ...
