Will a 300 MWh battery energy storage system be deployed in Mexico?

Image: BYD and Skysense, a Mexico-based developer of solar, storage and green hydrogen projects, announced an alliance for the implementation of 300 MWh of energy storage in Mexico and Latin America. The 300MWh of battery energy storage systems (BESS) will be deployed during the remainder of 2025 and 2026.

Why is energy storage important in Latin America and the Caribbean?

It will also be a key enabler of mass decarbonization and climate change mitigation, facilitating the expansion of variable renewable energy sources such as wind and solar while ensuring grid security. However, energy storage deployment in Latin America and the Caribbean (LAC) is still nascent.

Does Skysense support 300 MWh of energy storage in Mexico & Latin America?

BYD, Skysense, announced an alliance for the implementation of 300 MWh of energy storage in Mexico and Latin America.

Which battery energy storage systems will be deployed in 2025 and 2026?

The 300MWh of battery energy storage systems (BESS) will be deployed during the remainder of 2025 and 2026. BYD's MC Cube-T BESS will be the primary technology used in the partnership. In 2024, the Chinese company introduced the MC Cube-T, a modular 500kWh unit that can be expanded into up to 6.4MWh enclosures.

On.Energy announced its plans to deliver 39 megawatt-hours of battery energy storage systems to airports in Latin America, reducing emissions by 46,000 kilograms yearly.

BYD and Skysense, a Mexico-based developer of solar, storage and green hydrogen projects, announced an alliance for the implementation of 300 MWh of energy storage in Mexico and ...

On.Energy is collaborating with Skysense to install its battery energy storage systems (BESS) at 11 airports across South America. Through this project, more than 39MWh of turnkey ...

Developer of fully integrated energy storage solutions On.Energy is expanding its battery energy storage

Modular Smart Energy Storage Cabinets Used in Latin American Airports

system (BESS) solutions to select airports across Latin America, currently ...

Energy storage can bring many benefits to electricity systems, including enhanced grid reliability, efficiency, and flexibility. It will also be a key enabler of mass decarbonization and climate ...

On.Energy, a leader in the development of fully integrated energy storage solutions, is expanding its battery energy storage system (BESS) solutions to select airports across Latin ...

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions offer remote ...

On.Energy has installed battery energy storage systems for businesses and industries across North America and Latin America, including for airports, hotels, and retailers, including ...
