As the EU pushes for 45% renewable energy by 2030, projects like this could prevent enough CO2 emissions to offset Denmark's entire dairy industry. Now that's what we call a power move!

The Nordic region has become a hotspot for user-side energy storage power approval, driven by ambitious climate goals and innovative policies. From Sweden's carbon-neutral cities to Finland's ...

To demonstrate how the growth of wind power may be the driving factor for increasing the need for energy storage, an estimate of the future growth of wind power in Finland is made here.

Understand Nordic energy policy and how grid readiness, connectivity and storage requires collaborative policy.

According to SolarPower Europe, the EU will need between 500-780 GWh of installed battery storage by 2030 to meet its renewable energy targets. In 2024 alone, the European battery ...

In the Nordic countries (Denmark, Sweden, Norway & Finland), renewable energy (RE) already makes up more than half of the generation mix in each country. The high penetration of RE ...

In this instalment of our Nordic power sector transition series, we explore the emerging technologies in the region's energy transformation. From advanced storage solutions to nuclear ...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's ...

OX2 has sold its 50MW/110MWh battery energy storage project in Uusnivala, Finland, to the L& G NTR Clean Power Fund. The project will help regulate grid frequency and stability and participate in ...

Nordic user-side energy storage power approval

Merus Power's battery energy storage delivery represents a complete package, commissioned and tested according to the approval tests of Finland's transmission system operator, ...
