-----

1. A photovoltaic container, comprising a photovoltaic assembly (1), a support frame (2) and a container body (3); wherein the container body (3) comprises a container body framework;

The ornamental design for a returnable shipping container for photovoltaic devices, as shown and described.

Disclosed is a photovoltaic container (100), relating to the field of containers.

A main object is to solve the technical problem that an existing photovoltaic assembly is directly laid on a top face of a container, and the pressure of gravity of the photovoltaic assembly...

A main objective is to solve the technical problem that, as the existing photovoltaic assembly is directly laid on a top surface of a container, the pressure of the weight of the photovoltaic assembly can easily cause the ...

Complete Patent Searching Database and Patent Data Analytics Services.

the photovoltaic container generates electricity by means of photovoltaic panels laid on the top surface of the container, and is able to form an independent power supply and utilization system.

Abstract: An electrified container assembly and system is herein disclosed. The assembly includes a container, a first photovoltaic sheet, a battery array, electrified corner castings, electrified twist ...

Further disclosed in the present application is a photovoltaic power station using the container. The overall refrigeration efficiency of the container is high, such that refrigeration energy consumption can be saved on, ...
