Does Finland have solar power?

There is plenty of solar energy available in Finland, and solar power is predicted to be one of the lowest-cost electricity production methods in the coming years.

Where should I buy solar panels?

We recommend acquiring your panels from a reliable company that is sure to remain in business for the entire lifecycle of your solar power system. A good salesperson will answer any use-phase questions you may have, handle your warranty issues, if necessary, and enable you to expand your system and add new products to it.

What is HJT solar panel?

HJT stands for Heterojunction Technology. In HJT solar panels, the silicon cells are surrounded by a layer of amorphous silicon. HJT is new-generation technology that started to gain in popularity in 2023. The technology offers more reliable performance, better and improved heat resistance in solar panels.
