---

Renewable energy, usable energy derived from replenishable sources such as the Sun (solar energy), wind (wind power), rivers (hydroelectric power), hot springs (geothermal energy), ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Solar power, the direct conversion of sunlight into electricity, is arguably the most recognizable and rapidly growing renewable energy source. Photovoltaic (PV) panels, made from ...

Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use. It is a "carbon-free" energy source that, once built, ...

Solar energy is a renewable resource because it is a medium that uses the sun's radiation as a natural, unlimited energy source. Unlike the non-renewable ones consumed by extraction, it's as ...

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways ...

In this interactive chart, we see the share of primary energy consumption that came from renewable technologies - the combination of hydropower, solar, wind, geothermal, wave, tidal, and modern ...

Solar, wind, hydroelectric, biomass, and geothermal power can provide energy without the planet-warming effects of fossil fuels.

Hydropower and wood were the most used renewable energy resources until the 1990s. Since then, U.S. energy consumption from biofuels, geothermal energy, solar energy, and wind energy have ...

# Renewable energy resources solar energy

Renewable energy (also called green energy) is energy made from renewable natural resources that are replenished on a human timescale. The most widely used renewable energy types are solar energy, ...

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence): Solar PV is ...
