The Cat Creek energy & water project is part of the planning stages of a major pumped storage and renewable energy generation project in Elmore County, Idaho, on the South Fork of the Boise River.

[Power up to 1200W] RIVER 3 Plus portable power station delivers a steady 600W and surges to 1200W with X-Boost. It features 7 outlets--including 3 UPS-supported AC, 2 USB-A, a high-speed USB-C, and a car ...

Eco Flow River 3 is a must-have for any home that puts power security and comfort first. Ensure you're prepared with the power station made for almost any situation your family could find themselves in. All while staying ...

On its surface, floating solar appears to conserve water while generating carbon-free electricity. River managers are cautious, but some say the West can't afford to wait.

Floating photovoltaic (FPV) systems on reservoirs are advantageous over traditional ground-mounted solar systems in terms of land conservation, efficiency improvement and water loss reduction.

A line up of portable solar generators ranging from RIVER mini to RIVER Pro. Whatever you opt for, they're all small solar generators that can be held in one hand.

Conducting a thorough examination of the proposed site is paramount to ensuring successful solar energy installation on water bodies like rivers. Favorable locations should maximize solar radiation ...

Floating solar farms are revolutionizing clean energy by utilizing water surfaces to generate power efficiently. Explore benefits, challenges, and future trends.

In September, GRIC is planning to break ground on another experimental effort to conserve water while generating electricity: floating solar.
