In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away a large amount ...

SunGuard (TM) SNR 43 double-silver coating offers a 1.94 light-to-solar gain ratio on clear glass. Its low level of interior reflectivity helps enhance interior-to-exterior views in low light conditions.

Due to its clarity, consistency and solar control performance, Solarban® 70 glass has become the most commonly specified triple-silver-coated glass in the industry.

When your project requires elevated levels of occupant comfort and distinguished aesthetics, the Solarban brand of solar control low-emissivity (low-e) glasses by Vitro Architectural Glass (formerly ...

QUANTUM is a China-based global supplier of PVB, PDLC, TPU, EVA and other functional plastic thin films. It also distributes ultra-clear patterned solar glass as well as solar PV modules globally.

Solarban 70 glass is a type of low-emissivity or "low-E" glass. Low-E glass has a special coating that reflects infrared energy, helping improve the energy efficiency of buildings. The number 70 in the ...

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

The most important aspect of PV glass for solar panels is its ability to optimize performance under various climatic conditions through customizable specifications. These include ...

Learn all about solar control glass in this comprehensive guide. Discover its benefits, types, and applications, and how it can improve the energy efficiency.

Various levels of solar control glass can be seen around the newly renovated IQ Glass showroom, ranging

Solar glass level

from the standard 70/35 which is barely noticeable to the human eye, all the way up to a high ...
