Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such as per capita measures, as well as ...

If you're interested in learning more, you'll also find a thorough explanation of what Peak Sun Hours are, and how they can be used to predict solar power output and determine solar panel ...

Solar energy generation, measured in gigawatt-hours (GWh) versus installed solar capacity, measured in gigawatts (GW).

Calculate solar irradiance (GHI, DNI, DHI, GTI) for any location and date. Get hourly solar radiation data, monthly averages, and panel optimization. Perfect for solar energy planning with ...

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

France opened a flurry of nuclear power plants in the 1980s and 1990s, giving it low-carbon electricity ever since France's nuclear fleet gives it one of the world's lowest-carbon electricity grids

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

This report is posted every 5 minutes and includes system-wide and solar region aggregations of the Intra-Hour Photovoltaic Power Forecast (IHPPF) for the next two hours, with five ...

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

Solar power generation hours in Category 2 regions

Hourly solar report with forecasts as published by ERCOT. This report is published each hour and includes System-wide and geographic regional hourly averaged solar power production, forecasts, ...
