IREC's annual Solar Jobs Census is the authoritative account on solar jobs and the state of the solar workforce.

The solar power industry employs a wide range of occupations in a number of major industry segments: research and development, manufacturing of solar power materials, construction of solar power ...

According to IRENA 2024 report, the renewable energy industry now supports over 16.2 million jobs worldwide, with over 7 million jobs in solar PV and heating/cooling alone. This positions ...

Wind and solar electricity output account for a large and growing portion of power generation, with jobs in those sectors making up an increasing share of energy employment. This ...

Last year, 18-29-year-olds made up nearly one-third of the solar workforce, a much higher percentage than the overall workforce, indicating that Gen Z workers are capitalizing on the growing ...

That's almost half a million jobs! Naturally, there are many fundamental factors regarding solar power that make it competitive, make it dominate new power capacity, and lead to so many jobs.

America's solar industry is growing, but ending federal support piles pressure on the labor market. Here, we propose ways to manage future workforce volatility.

According to the Solar Energy Industries Association (SEIA), the number of solar businesses in the U.S. now exceeds 10,000, contributing to job ...

According to the Solar Energy Industries Association (SEIA), the number of solar businesses in the U.S. now exceeds 10,000, contributing to job growth across multiple fields, ...

Solar power generation system recruits a lot of workers

As governments and corporations push for a cleaner energy future, the solar workforce is increasingly strained by rising demand for qualified technicians, project managers, and engineers.

In order to develop a well-trained, equitable, and inclusive workforce with high-quality jobs, DOE's Solar Energy Technologies Office (SETO) solicited input from a variety of stakeholders on employment ...
