It also operates the largest battery laboratory in Switzerland for cell and module testing, the Battery Testing Laboratory, together with the BFH Energy Storage Center. The research center collaborates ...

With a comprehensive service portfolio of consulting services as well as testing and inspection, we support battery manufacturers throughout the entire manufacturing process - from material ...

As Switzerland's largest battery testing lab, we provide cutting-edge infrastructure and expert support to help startups, SMEs, and industry leaders develop, validate, and optimize their energy storage systems.

PSI Center for Energy and Environmental Sciences Laboratory for Battery Science (LBS)

Analyses of properties and performance of battery cells as well as measurements to determine service life and thermal properties, carried out on state-of-the-art test stands.

Featuring multiple ESPEC environmental test chambers, the laboratory is the largest in Switzerland for cell and module testing, and is open to startups, SMEs, and large companies seeking to test their ...

The largest battery laboratory in Switzerland for cell and module testing enables #startups, SMEs or large companies to test their energy storage systems in a complete environment with the...

Testing services for battery cells, modules and entire systems, from small hybrids to full electric cars. The battery is the key component of the electric vehicle.

Switzerland's largest battery laboratory for cell and module testing enables start-ups, SMEs and large companies to test their electrochemical energy storage systems in a complete environment with the ...
