As we begin 2025, Taiwan's solar market is grappling with a combination of regulatory challenges, public distrust, market instability, and limited community involvement.

From 2013 to 2021, total solar energy production has increased considerably, and many renewable energy producers located their solar systems in specific regions.

TAIPEI (Taiwan News) -- Legislation passed by the Kuomintang and Taiwan People's Party on Nov. 14 has significantly tightened environmental impact assessment requirements for solar ...

However, as the frequency of extreme weather events increases and the urgent need for energy transition has become a global consensus, solar power is an important part of today's main ...

Abstract: The main elements in Taiwan's green power shift are reviewed, with focus on developments since the election of the DPP government in early 2016 and its commitment to phase out nuclear ...

Taiwan's solar power industry is forging ahead amid an ambitious drive to help reshape the nation's topsy-turvy energy landscape, but the journey remains fraught with physical constraints...

Despite Taiwan's abundant sunlight, expanding solar power remains a challenge due to limited land availability. Enhancing the light-to-electricity conversion efficiency of solar cells is a core ...

Amid weak government communication and a lack of transparency, renewable energy has become yet another partisan battleground in Taiwan.

Taiwan's Ministry of the Interior (MOI) has released a draft regulation that aims to require PV installations on most new, expanded, or renovated buildings above a certain size, as part of the ...
