ACODE and Heifer International in Uganda are grateful to Mott Foundation for the financial supported provided under Distributed Renewable Energy Ecosystem Model (DREEM) Hub project, without ...

This Guideline supports solar installations that are off-grid and include systems where all the energy is supplied from solar photovoltaic modules (or when a fuelled generator is used either as a back-up or ...

UOMA"s annual Market Map publication provides an in-depth perspective on the current state of the off-grid energy sector in Uganda and illuminates the work being done by the various actors.

This paper discusses Productive Uses of Renewable Energy (PURE) impacts in Uganda for rural communities using solar water pumping, solar mini-grids, solar chilling, and solar crop drying.

The assessment report on the Productive Use of Renewable Energy (PURE) in Uganda provides an in-depth analysis of the potential, challenges, and opportunities of solar energy for productive use in ...

Solar photovoltaic (PV) mini-grids are a nascent technology in Uganda; only a few are operational, such as the Kitobo solar power plant in Kalangala district. Most solar PV mini-grid business models are ...

Our travel in western Uganda between Kampala and Fort Portal showed us hundreds of households adjacent to the grid that remained off-grid, unable and unwilling to bear the financial ...

Scale up the use of solar PV systems at schools, health clinics, and business levels in the district of Kasese by building local capacity to install & maintain solar PV systems

UOMA seeks to reduce barriers to scale to accelerate off-grid energy access in Uganda. Today, about 80% of Ugandans live without access to modern energy. Bringing energy to these households has ...

Ugandan farm uses 80kWh off-grid solar outdoor cabinet

The report analyzes off-grid solar adoption and the role of flexible payment mechanisms such as PayGo as a driver for energy access. This study conducted by the Schatz Center uses two ...
