-----

The 200-megawatt system spans six locations across Ukraine and represents one of Eastern Europe's most significant energy storage deployments. Each site has a capacity between 20 ...

Despite the many challenges of building energy projects in a war zone, Ukraine's largest battery energy storage project has entered its final delivery phase - ahead of schedule.

DTEK and Fluence, a global leader in energy storage, have announced the early deployment of this project. The 200 MW system, spanning six locations, is in its final phase, including ...

Fluence has successfully completed the largest battery-based energy storage project in Ukraine, showcasing its leadership in energy storage solutions. The project was constructed and ...

Ukraine's thermal power stations - primarily coal-fired - have borne the brunt of the attacks. Despite heroic efforts to maintain operations, as of September 2024, the country had lost ...

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation ...

With conventional power plants becoming strategic liabilities, distributed energy storage systems paired with solar offer both resilience and rapid deployment advantages.

On July 10 - Maxim Timchenko, CEO of DTEK, led a session at a URC stage, launching Ukraine's biggest-ever battery storage project, using U.S.-made batteries from Fluence.

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, they have the ...
