-----

MINMAX's ultra-high isolated DC to DC converter modules offers some of the most cost-effective solution for wind turbines, solar panels, transportation systems, and industrial control equipment where high I/O isolation ...

Pico Electronics, a leader in miniature power components, offers an extensive range of High Voltage DC-DC converters designed for critical applications in aerospace, defense, and commercial industries.

Our market-leading high voltage DC-DC converters are designed with long term reliability, accuracy, and repeatability of performance at the forefront of the design and manufacturing processes.

High-power AC-DC and DC-DC converter units with high efficiency and reliability. Modular units suitable for most modern applications.

Featuring an ultra wide input, CUI's High Power DC-DC Converter family is available in models ranging from 50~600 W. The converters are housed in industry standard pcb mount packaging or chassis mount ...

Ideal for solar inverters, wind turbines, energy storage systems, and other renewable energy applications requiring high-voltage DC-DC conversion.

Ecowatt I7000 series special inverter can meet the requirements of wide DC voltage range, high reliability, high safety and high stability in harsh environments such as industrial applications.

Choosing the right high wattage power inverter can make all the difference in efficiently converting 12V DC power to standard 110V/120V AC power for vehicles, homes, and off-grid setups.

This paper introduces a non-isolated DC-DC converter designed to achieve ultra-high step-up (UHSU) voltage conversion utilizing a two-winding coupled inductor (CI).

# Ultra-high current DC special inverter

In this paper, a new ultra-high voltage gain quadratic DC-DC converter based on coupled-inductor is introduced for renewable energy applications.
