The 1609 is uniquely designed for the industrial market to provide back-up AC power to the control cabinet. The 1609 will provide back-up power to bridge dips, sags, or brief losses of power.

Our engineering supports you from the first minute and works out the perfect UPS solution in the control cabinet or in the wall-mounted enclosure with you, depending on the required size and battery capacity.

Uninterruptible-power-supply sizes range from 200 VA up to 1,500 kW. Application of each boundary is totally different. In most cases we are talking about 200 VA to 3,000 VA located in the control ...

Our systems are engineered to meet the demanding requirements of industrial, automation and process control environments, ensuring uninterrupted performance and protection for sensitive equipment.

The TRIO DC UPS combines an uninterruptible power supply with an integrated power supply, thereby saving space in the control cabinet. The robust solution offers comprehensive functions such as signaling, ...

Depending on requirements, the UPS modules can be mounted directly on a DIN rail or on the rear panel of the control cabinet. Communication with an industrial PC is either via OCT, USB, or digital signals. The retention ...

This saves space in the control cabinet and minimizes the time required during commissioning. Whether you need a solution with or without an interface, our TRIO DC UPS devices ensure a stable and continuous ...

Robust aluminium-housed DC UPS modules provide 12?V, 24?V, or 48?V uninterruptible DC power in a variety of cabinet applications.

Browse our products and documents for Industrial UPS - Proven Industrial UPS power protection for control applications and harsh environments.

Uninterruptible power supply for control cabinet

This product is a power supply control device with an input voltage range of AC 110-240V and an output voltage of DC 12V at a current of 5A. It features stable and adjustable voltage output and is housed in ...
