How do you charge a portable power station?

Portable power stations are usually charged via the mains- it's quick and efficient, especially for higher-capacity units. Many also let you charge the device from the car using a 12V cigarette lighter socket - ideal for those living the van life or in the RV. You can recharge some devices using solar panels, too.

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

How much does a portable power station cost?

Portable power station pricing typically aligns with capacity and features: Entry-level models (\$150-350): Perfect for occasional weekend trips with basic power needs like phone charging and LED lighting. Mid-range options (\$350-600): Optimal for regular campers, providing 500-700Wh capacity with comprehensive safety features for family trips.

Can a portable power station be recharged using solar panels?

Portable power stations come in a broad range of sizes, from smaller models capable of charging a few devices to high-capacity backup units to keep your lighting and critical appliances on during a days-long blackout. And, many can be recharged using solar panels.
