Should you put solar panels on your rooftop?

Solar panels offer renewable energy when installed on rooftops. One reason to invest in them is to benefit from the sun. However, solar panels are fragile and can be damaged by external threats, such as birds, rodents, or squirrels.

What is rooftop solar power?

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power for your home or business.

Are You a good candidate for rooftop solar?

Not every home is an ideal candidate for rooftop solar. Several factors determine your roof's solar suitability and potential energy production. **Roof Age and Condition:** Your roof should be in good condition with at least 10-15 years of remaining life.

Is rooftop solar a good investment?

Rooftop solar power represents one of the most impactful decisions homeowners can make for their finances, energy independence, and environmental impact. With 2025 bringing continued cost reductions, technological improvements, and strong federal incentives, the value proposition for rooftop solar has never been stronger.
