Photovoltaic systems account for the great majority of solar capacity installed in the world. CSP represents a minor share of solar power capacity, and is present in significant quantities only in a few ...

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

Solar electricity capacity, million kilowatts, 2022: The average for 2022 based on 189 countries was 5.64 million kilowatts. The highest value was in China: 393.03 million kilowatts and the lowest value was ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Asia, with 602,933 MW, Europe, with 233,821 MW, and North America, with 129,037 MW, were the leading regions worldwide in solar energy production.

Explore the top solar power countries in 2025, including China, the U.S., India, Japan, and Germany, plus emerging leaders like Brazil and Australia, driving the global shift to sustainable ...

OverviewGlobal use figuresAfricaAsiaEuropeNorth AmericaOceaniaSouth AmericaMany countries and territories have installed significant solar power capacity into their electrical grids to supplement or provide an alternative to conventional energy sources. Solar power plants use one of two technologies: o Photovoltaic (PV) systems use solar panels, either on rooftops or in ground-mounted solar farms, converting sunlight directly into electric power.

Discover which countries are taking advantage of solar power and how they are implementing systems to use solar as a viable source of energy.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw

World Solar Generator Ranking

rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

Looking at the share of countries' electricity generation, Greece leads the world, with nearly 28% of its electricity now coming from solar power!

See which countries have installed the most solar power, and which ones have the fastest annual growth rates over the last decade.
