-----

It is the world's first offshore wind power self-elevating construction platform, integrating large wind power equipment piling, lifting, installation and other functions and providing a "key weapon" for the company's ...

That means even higher wind power generation totals can be expected going forward, ensuring that China will retain its position as the global wind sector leader.

This chapter comprehensively discusses wind power generation, tracing its evolution from historical windmills to modern large-scale wind farms, and analyzing its technical principles, resource ...

A record-breaking 20-megawatt (MW) offshore wind turbine has been connected to China's grid in the Fujian Province.

China is racing to develop a new generation of wind farms that can not only survive tropical cyclones, but also harness their power.

It can generate 26 megawatts (MW) of energy, more than double the global average for individual turbines. But its record is about to be smashed to smithereens: another offshore wind turbine that...

BEIJING, April 22 (Xinhua) -- A giant 16.2-megawatt land-based wind turbine, the largest single-unit onshore wind power generator in China, has been successfully installed in the eastern province ...

From steppe to power source, China's wind energy sector is revolutionizing the country's electricity supply and taking on a global leadership role. With its vast landmasses in the north and an...

A project of China's leading nuclear power operator China General Nuclear Power Corporation (CGN), the wind power plant built in Hinggan League, Inner Mongolia, is one of the country's first batch of ...
